

Modified Atmosphere Packaging System

The model V45 combines the durability of our V32 bag machine with the sleek design and versatility of our V60 bag machine. The result is an intermittent motion vertical bagging solution that is designed to withstand harsh environments where high pressure washdown is required.

Designed with a purpose, the V45 features an all-stainless steel design allowing you the ability to hose down your machine without having to cover any components. From easy-change features to user-friendly controls and a highly efficient operating system, this rugged solution will maximize your uptime and increase packaging efficiencies.

Standard Features

- 100% stainless steel and FSMA, FDA, & USDA compliant.
- Always ready for wash-down as we build-to IP69 specifications assuring IP67 compliance
- B&R controls
- Tool-less forming horn changes
- Recipe-based color touchscreen
- Robust, self-aligning stainless steel jaws
- Servo-driven vacuum belts with integrated brushes

Accessories & Options

- Gas flush for MAP applications
- Roll stock cart
- Film printer

- Infeed/discharge conveyors
- 3" unwind shafts for up to 18" film rolls
- Dehumidifier in control box
- Poly-resistive seal bars

Specifications

- Bag styles: pillow & gusset
- Speeds: up to 45/minute
- Bag widths: up to 13"
- Electrical: 440-480V/30A/3PH
- Air: 80 psig
- CO₂ capable of 10 cfm at 100 psig (if required)
